- Notes
1. Federal Financial Institutions Examination Council (FFIEC) Demographic Data for 2024.
 2. The Census Bureau does not release household counts by household income category. The values for estimated household counts must be derived from a table that denotes household counts within income brackets. The process of computing the counts involves calculating the lower and upper income values for each income category. Then, using a mathematic ratio, select the household counts from the income brackets provided. Since the process involves deriving non-integer counts, the numbers can vary due to decimal precision.
 3. Percent of Bank Loans is the row count of loans in the Geographic Area as a percentage of the total count of loans in the Geographic Area.
 4. Household Percent and Estimated Household Percent is the row count of households in the Geographic Area as a percentage of the total count of households in the Geographic Area.
